Education

Swami Keshvanand Institute Of Technology — Rajasthan, India
Bachelor Of Technology(Information Technology) — *Sep 2024 – Aug 2028*

Cambridge Court High School — Rajasthan, India
Higher Education (Class XII) — *April 2023 – March 2024*

Experience

Software Developer Intern — Nov 2025 – Present
Oasis Infobyte — *Remote*

- Developed and optimized full-stack web applications using React.js and Node.js, improving load efficiency by **25%** and reducing API latency by **15%** .
- Automated key tasks and integrated REST APIs, increasing feature delivery rate by **30%** while maintaining code quality through unit testing.
- Collaborated in Agile sprints using Git and CI/CD pipelines, ensuring **100%** deployment success and consistent version control across environments.

Open Source Contributor — Aug 2025 – October 2025
GSSOC — *Remote*

- Contributed to open-source projects under the GSSOC 2025 program, focusing on frontend, backend, and full-stack web applications.
- Implemented bug fixes, feature enhancements, and documentation improvements, with 8+ pull requests successfully merged.

Projects

Attend-AI | *HTML, CSS, JavaScript, MongoDB* — August 2025 – Present

- Designed and developed a real-time conference room booking portal enabling users to seamlessly book and manage meeting slots.
- Implemented secure authentication and authorization (JWT, role-based access control) to ensure data privacy and role-specific features.
- Integrated email confirmation and Google Calendar–compatible meeting links, improving booking efficiency by 30%

FinCentra | *HTML, CSS, React, Node, Express,MongoDB* — August 2025 – Present

- Built a fully responsive clone of Zerodha's trading platform using React and Node.js, focusing on speed, reliability, and user experience.
- Optimized UI rendering and backend API calls, reducing page load time by 25% and enhancing cross-browser performance.
- Emulated client-side trading features like input validation, interactive charts, and instant transaction feedback, simulating a real trading environment.

Skills

Languages: C, C++, Python, SQL, JavaScript, HTML, CSS, Java
Frameworks & Libraries: React.js, Node.js, Express.js, REST API, Mongoose
Developer Tools & Database :VS Code, MongoDB, MySQL
Cloud & DevOps Tools: GitHub, Google Cloud Platform, AWS EC2, AWS RDS, Netlify,
Tools & Methodologies: Git, Docker , CI/CD pipeline, Postman, Agile(Scrum)
Soft-Skills: Leadership, Time Management, Product Thinking, Tech Agility, Adaptability, Team Collaboration

Certificates

- JP Morgan Software Engineering Virtual Internship
- AWS Solution Architect Virtual Internship
- IIT kanpur Hackathon
- Code for Bharat Hackathon
